Comments.

- (1) [redacted] it is believed that the shipments were dispatched from the Aue area. On the basis of previous information it is believed that the trains were composed of 40 to 45 cars. See also paragraph 2, 3 and 4 of the present report. In the second half of March there was an average of one train per day. It is believed that all uranium ore shipments were covered during the reported period.

- (2) [redacted] 25X1

- (3) The uranium ore shipments observed in early April probably do not represent the total of these shipments.

- (4) This shipment was reported previously. [redacted] 25X1
